

Concrete Hoppers

Concrete Hopper - The self-dumping hopper attachment could automatically activate to both unload and release as soon as the bumper release touches the side of a dumpster. As soon as dumping is finished, the hopper could go back to original upright and locked position. This particular piece of machinery is likewise existing together with a cable which enables operation from the seat of the lift truck so as to have the option of manually dumping the hopper. There is a locking chain provided to be able to lock the hopper to the fork truck. This product is constructed with reliable and consistent robotic welds for maximum strength. The forklift dumping hopper even has a blue powder coat finish to maintain durability.
